Nathan and Sarai Taylor

Nathan and Sarai’s daughter, Anna, was affected by Krabbe Disease.

Anna was diagnosed with Krabbe Disease at 5.5 months of age. She lived as full of a life as Sarai and Nathan could provide for her until her passing at 23 months old in April 2015. Anna loved snuggles, going for walks, listening to music, and dancing.

Before her passing, the Anna Claire Taylor Law was passed to provide newborn screening for Krabbe Disease for every newborn in Kentucky. Their prayer is that through Anna’s beautiful life, other children might be afforded the opportunity for lifesaving treatment.

The Taylors want to be a part of a vision where every individual affected by a Leukodystrophy is given the same opportunity for improved quality of life through a team that gives them all the tools required to battle these diseases. Their prayer for the future medical care for Leukodystrophies is the families of those affected will be given the knowledge and equipment to provide the highest level of care and quality of life for their loved one.

Nathan and Sarai live in Beaver Dam, Kentucky
